Material

Eco Friendly

100%
non-toxic

Industrial

Developed from years of research together with the latest manufacturing technology, **GREENWIPES™** was the first & the only environment friendly wipes that were produced from recycled plastic bottles. It was entirely a new innovation & was the greatest engineering breakthrough of the decade. For the first time, we were able to turn these worthless waste bottles into a highly versatile & multi-application product. Each piece of **GREENWIPES™** not only contributes towards reducing landfills, it also extend the rate of recycling as each used **GREENWIPES™** can also be further recycled back into bottles or other products. Recycling 1 ton of plastic help us saves 199.8 cubic feet of landfill space in our planet and makes the world more liveable for our future generations.

GREENWIPES™ is developed to replace one of the most used & polluting item in the industry; Cotton Rags. Unlike cotton rags which hardly perform its duty, **GREENWIPES™** is specially engineered to absorb & wipes off of any types of liquids/dirt at up to 3x times the performance of cotton rags. This includes any form of liquids that you could possibly find like water, all types of liquids, oil, greases, solvents and chemicals. Even some of the most aggressive solvents available in the industry such as *Methylethyl keton (MEK)*, Isopropyl alcohol(IPA), **GREENWIPES™** can handle them without falling apart.

The packaging design of **GREENWIPES™** also enable remarkable space savings & tremendous portability. Each box / pack of **GREENWIPES™** has the capacity of more than > 2 bags of 20kg cotton rags but comes with the portability of 30cm cube box weighting less than 2kg. That is more than 5 times of space saving.

Start trying **GREENWIPES™** today and you will be amazed on its superior performance, space savings, and improvement of productivity at a valuable price significantly more economical than cotton rags.

IS TIME TO CHANGE...

Introducing... **GREENWIPES™**

We Turn Waste
Bottles

INTO

Eco-Friendly
Wipes

Turning waste into sustainable wiping solution.

How **GREENWIPES™** was made

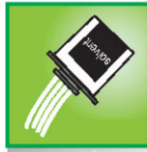

GREENWIPES™ Features

Strong, Not Easily Tear & Reusable

Whether it is Wet or Dry, GREENWIPES™ is as strong as cloth. It can be rinse and reuse multiple times before you need to dispose it away. This saves you lots of money and cut down unnecessary waste.

Chemical Resistant

GREENWIPES™ is build to withstand all types of chemicals & solvents including some of the toughest such as Methyl ethyl ketone (MEK) and Isopropyl alcohol (IPA).

Eco-Friendly

Each GREENWIPES™ is designed to help make this world more sustainable. It is designed based on the concept of 3R which is to "Reduce" your consumption, can be "Reuse" for multiple times & "Recycled" when dispose.

Highly Absorbent & Superb Wiping Performance

With 3x times the absorbency of cotton rags / rental towels, GREENWIPES™ perfectly wipes off water, oil, solvent, chemical or any other types of liquid in your workplace without leaving any residue behind.

Low Lint

All GREENWIPES™ are ultra low lint which minimise contamination and performs like lint free cloth. This make it exceptionally ideal even for tasks in automotive / aviation pre-painting, electronics and labs. Our GREENWIPES™ Pro series also offers particle free features for tasks in cleanroom.

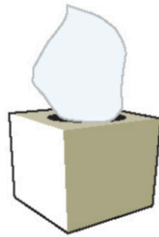

Portable

Each box of GREENWIPES™ is compact & light weight and remarkably portable. With each weight lesser than 2kg and size similar to a basketball, you can carry GREENWIPES™ anywhere and whenever you need it.

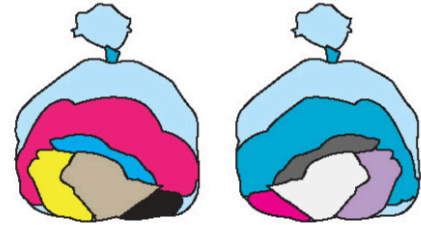

High Capacity

Each box/pack of GREENWIPES™ is 400 sheets in capacity. That's equivalent to more than 2 bags of cotton Rags which weight more than 40kg and comes only with a total 320+/- pieces of rags.
